

RF Staff Engineer

JOB DESCRIPTION

TeraSys Technologies LLC is seeking a Staff Engineer to assist in our growing number of projects in the design of custom RF subassemblies. The Staff Engineer is responsible for the execution of entry-level to moderately difficult technical tasks with moderate supervision.

JOB DUTIES

Position duties include the execution of technical tasks of entry-level to moderate difficulty in the domain areas of radio frequency circuits and electromagnetic analyses as well as mixed mode and system engineering.

MINIMUM REQUIRED QUALIFICATIONS

- Bachelor's degree in Electrical Engineering or equivalent; Advanced degrees will receive special consideration as long as the advanced degree is in a technically relevant domain
- Must be a US citizen (green card holders are not eligible)
- Entry level positions are available; desired experience is at least 3 years of work experience post-baccalaureate or as a research assistant
- Technical competency working on custom RF circuits such as filters, amplifiers, frequency converters, or any other typical subassembly; special consideration will be given to those candidates that can demonstrate past performance in the development of circuits that integrate digital and analog functionality
- Candidate must possess excellent technical writing, presentation and oral communication skills
- Ability to work in a multi-disciplinary team environment.

DESIRED QUALIFICATIONS

TeraSys Technologies is seeking to add an individual capable of adding to our elite team which requires a unique combination of strong technical skills as well as a strong match to our Company culture. In addition to the above named qualifications, we desire an individual who:

- Has excellent skills working in a team either as a leader or team member
- Has a proven track record of consistent professional growth in relevant skills
- Prides themselves on providing world-class Customer Service
- Has a strong understanding of next generation radio and wireless systems
- Has a demonstrated track record of innovation such as refereed technical research publications, patents, principal investigator roles, etc.

TeraSys Technologies offers an attractive benefits package including a competitive salary, medical, dental, and vision insurance, life insurance, short and long term disability, paid time off, participation in our profit share plan and a retirement plan with company match. Extremely superior candidates may qualify for our equity share Phantom Stock Program.

Ready to apply? We invite you to send your resume along with cover letter to careers@terasys technologies.com and reference job code **162-EE-1105**.
